CubToken
Eco-White-Paper

About CubToken

The CubToken project is an ongoing development project that has a 4-layer block-chain and traffic generating SEO ecosystem made up of 4 Tokens. CubToken (CUBT), Cub21(CUEC) "Development Utility",
CubYield (CUBY), and CUBAI (CUBI) each are briefly described In this document and on CubEmpire.com. CubTeam is marketing the process of decentralization. We are the Bear Market Token that owns the
bear market brand idea. CubToken is the bear that rides the bull during bull runs.

CubToken is the 500tril max supply first and top layer of the ecosystem, cubtoken.com.

Cub21 is the smart contractual 21million max supply powerful ERC20 store of value 2nd layer of the CubToken ecosystem, Cub21.com.

CubToken (CUBT) "Layer 1" and Cub21 (CUEC) "Layer2" both are built on top of the Ethereum Network.

CubYield (CUBY) Layer 3 is built on top of the Binance SmartChain Network. The CubTeam is gearing to soon release the bridge between CubToken and CubYield within the ecosystem. While marketing the process of decentralization, the CubTeam is compartmentalizing each development section while on-boarding new third-party partners so that marketing campaigns can be target specific during each step. As a result, holders who value the project as
A whole will become a part of the homegrown CubForce Community.

Layer 4 is CubAI (CUBY) built on the Polygon Network. Strategically in place for qualified private investors and third-party partners. CubAI (CUBI) is the fourth and final layer of the CubToken ecosystem, CubAI.io. It is the bottom private layer of the CubToken
Ecosystem. Each layer becomes harder for the public to access. CubTeam is qualifying target holders through third-party partners, businesses, and private investors. CubToken is the most famous token and it has less than 600 holders. Please see https://twitter.com/cubtoken to see our current listings.

CubToken Mission

The CubToken Project is an experiment in decentralization, an ongoing development project. CubToken bridges the gap between the Web2 centralized mindset and the Web3 decentralized movement. Within the CubToken ecosystem exist a third-party strategy "ExecAuthority.com" between a network of businesses and CubToken. The mission of our project is to expedite the bridging of integration and adoption within this gap while maintaining the confidentiality and trust of proprietary marketing data.

The CubTeam is providing custom solutions to qualified holders "CubNomic.com" from different marketing environments CubTeam and Partners are Leveraging a fifty-plus-year network of trusted clientele, using third-party contracts, authorizing businesses to upgrade their Web2 marketing with Web3 solutions. Web2 to Web3 upgrades "hypothetically speaking" are provided by qualified volunteers within the Community.

The CubToken project allows the CubForce Community to build CubToken for CubToken, meaning an added layer of Value through custom decentralization marketing channels. Possible within the Community by providing an ongoing development environment full of solutions built by the qualified private Business network through third-party volunteer businesses and owners. We call it the CubToken Digital Wealth Class.

To create security within the process of decentralizing, the CubTeam is taking advantage of centralization by using an existing third-party market lock-out strategy and building the importance of the CubToken asset with a measure of confidentiality.

Web3 Development: CubToken is the Top layer of development, followed by 3 other blockchains within the CubToken Projects strategically designed blockchain, and marketing ecosystem.

Strategy Strategy Strategy equals longevity. Like Twilio, instead of ask your developer, with CubToken, it's ask your holders.

Cub21 Mission

Cub21Dynamic Liquidity Max Supply:21,000,000

The CubToken Project has successfully deployed Cub21 (CUEC)! This Token is currently a development-only utility token!! It is purposed within CubToken's Ecosystem to mimic the scarcity Strategy of Bitcoin "21,000,000 Max Supply". CubToken's Ecosystem is also under development at CubNomic.com. CubTeam believes Cub21 (CUEC) is a token that will assist in expediting the growth of the entire ecosystem.

With a small-scale test community of only 500 CubToken (CUBT) holders, data collected from Nomics charts produced enough information on Fear/Greed behavior that CubTeam used the data to help engineer future token dump preventative measures. Because of this, the first airdrop campaign proved to be successful. CubTeam used early dumpers data to determine that Cub21 (CUEC) should be used to help catapult the entire adoption of the CubToken Ecosystem. Now, Cubtoken's (CUBT) value potential based on 66% locked liquidity, 28% development treasury, and 3.62% donation pool makes both tokens shiny for mass adoption.

Qualified centralized exchanges will become more purposeful in the overall development of the CubToken Ecosystem.

CubYield Mission

BRIDGING ETHEREUM & BINANCE SMART CHAIN NETWORKS

The CubYield Project is an experiment in decentralization, an ongoing development project. CubYield bridges the gap between the Web2 centralized mindset and the Web3 decentralized movement. In addition, CubToken and CubYield are designed with the ability to bridge between the Ethereum and Binance networks. For the sake of our growing community, Within the CubYield ecosystem exist a third-party strategy "ExecAuthority.com" between a network of businesses and CubYield (CUBY). The mission of our project is to expedite the bridging of integration and adoption within this gap while maintaining the confidentiality and trust of proprietary marketing data.

The CubTeam is providing custom solutions to qualified holders "CubNomic.com" from different marketing environments. CubTeam and Partners are Leveraging a fifty-plus-year network of trusted clientele, using third-party contracts, authorizing businesses to upgrade their Web2 marketing with Web3 solutions. Web2 to Web3 upgrades "hypothetically speaking" are provided by qualified volunteers within the Community. The CubToken project allows the CubForce Community to build CubToken for CubToken, meaning an added layer of value through custom decentralization marketing channels. Possible within the community by providing an ongoing development Environment full of solutions built by the qualified private business network through third-party volunteer businesses and owners.

We call it the CubToken Digital Wealth Class. To create security within the process of decentralization, the CubTeam is taking advantage of centralization by using an existing third-party market lock-out strategy and building the importance of the CubToken asset with a measure of confidentiality.
Web3 Development: Again, Strategy Strategy Strategy equals longevity.
Like Twilio, instead of ask your developer, with CubYield, it's ask your holder. To learn more click on everything and read Everything at CubYield.com. Project Clarity Announcement:
CubYield is in the charity of generosity, CUBY adoption will create momentum, and exchanges will follow. Owner owns 0 tokens > Devs CubDrop (airdrop) to strengthen community growth > NFT Production will roll out > Yield Farming > CubYield is for the wealth class of the earth! All interested ones can email our official email at support@cubyield.com. CubTeam is full of awesome volunteers who are interested in the art of community-driven decentralization.

CubAI Mission

The AI industry is a $143bil industry annually. The CubTeam is using the final layer of the CubToken project's ecosystem to help bridge the gap between traditional finance, block-chain, security, and trust.

Qualified and Private means no thieves and scams allowed.

CubAI is protected data under third-party ExecAuthority.com

CubAI is on the Polygon Network and is the last and final layer of 4 cryptocurrencies that make up the completion of the CubToken projects ecosystem and business network.
